

VersaClock® 6E Family of Devices

5P49V6965 – 4 Outputs(1 Ref) Standard Option

5P49V6975 – Integrated Crystal Option

5P49V6967 – Additional 3 Outputs Option

5P49V6968 – Additional 7 Outputs Option

VersaClock® 6E Family Snapshot

High-Performance Programmable Clock Generator

Features	Benefits	Applications
<ul style="list-style-type: none">• 1 KHz to 350 Mhz output frequency• <500fs rms jitter(12 KHz to 20 Mhz)• Output/core voltages: 1.8V, 2.5V, 3.3V• Any-in, Any-out frequency translation• 4 independent programmable frequency domains with spread-spectrum control• Customizable startup configuration• Integrated crystal product option• Small 4 x4 mm VFQFN package	<ul style="list-style-type: none">• Flexible for system design• Minimize BER and more design margin• Extends battery life• Reduce BOM• Space saving• Easier material/logistics management	<ul style="list-style-type: none">• Server and storage• Ethernet switch/router• PCI Express 1.0/2.0/3.0/(4.0)• Broadcast video/audio timing• Multi-function printer• Processor and FPGA clocking• Any-frequency clock conversion• Telecom line cards• Laser distance sensing• Audio

Example Use Case
